SHOPPING BASKET

Custom shopping basket

At ShopQuip, we specialize in designing and producing custom shopping baskets to align with our customers' unique specifications.

Whether you're looking for a specific color palette to match your brand or require custom branding, such as a personalized logo, we have the capabilities to meet your needs.

Our experienced design and production teams work closely with you to ensure that every detail, from the material and ergonomics to the aesthetic appeal, reflects your vision.

In addition to color and branding options, we offer the flexibility to incorporate special features or functional details that set your shopping baskets apart.

This could include unique handle designs, extra compartments, or specific dimensions tailored to your store layout and customer experience.

With our own production facility in Qingdao, China, and expertise in creating high-quality retail equipment, we guarantee both efficient manufacturing and strict quality control throughout the process.

Whether you need shopping baskets for a small boutique or a large retail chain, ShopQuip delivers durable, practical, and visually striking solutions that meet the demands of your business and resonate with your customers.

From concept to finished product, we ensure that your shopping baskets are not only functional but also a reflection of your brand identity.

ESL Solution

ESL small screen

Size	Art. nr.
70 x 35,0mm	SHX190111
85 x 45,5mm	SHX190112
90,5 x 44mm	SHX190113

Electronic Price Label Features

Electronic Shelf Label (ESL) is a digital wireless display systems ideal that offers the ability to wirelessly update content on shelving signage quickly and efficiently, including product pricing as well as product related information. The ESL display information is managed in real time by the control system on a computer via wireless network.

Supermarkets, groceries markets, pharmacies, warehouses, and any industry that depends on paper to display their prices can switch to the perquisites of the ESL's.

ESL system provides one shot investment then give continuous benefits to the customers. Here are some of the major benefits that the System:

reduces pricing management labor costs, improves pricing accuracy, allows dynamic pricing and reduces labor & human error then lower labor training cost.

This system also give easy operation, batch information update, customized display and provide online/off-line sales operations.

Electronic Shelf Label (ESL) offers many benefits, for example. Extremely low power consumption allowing up to 5-year battery lifetimes, support low / normal temperature operation, very wide viewing angle on the very top and bottom shelves to be easily readable by customers, support multi color and twinkling and position allocation functions.

ESL medium screen

Size	Art. nr.
98 x 60,3mm	SHX190114
103 x 92 mm	SHX190115

Base Station Description

The base station is an key communication device of system that connected among the software system and ESLs wirelessly and with the following benefits.

- Fast price change : ESL information change in batch mode, update target ESLs contents in real time.
- Up to date transmission technology: Applies wireless radio 2.4G SDR radio frequency, anti communication
- distortion from WIFI device and mobile phones.
- Encrypted Communication transmission, data is reliable and accurate
- Communication interaction: Bi-direction communication, real-time interaction.
- Maximum wireless communication distance 30m (Depends on physical environment)
- Parallel communication, safe and fast
- Support POE charge, no additional power supply required
- Multi route communication and more capacity design, no fear on breakdown

ESL large screen

Name	Art. nr.
140 x 117,5mm	SHX190116
185 x 128,5mm	SHX190117

PDA Description

- WIFI Communication between Sever and PDA
- Concise Human machine interface (HMI)
- Portable and durable
- Support scanning code for binding / unbinding between goods and ESL
- Support code scanning check and information update
- Support instant price change
- Batch update ESL information through base station

STAINLESS STEEL SERIES

Combi table

Size
1000x600x1100mm

Art. nr
SHX180111

Two sinks is separated by divider. Left sink is for cleaning bake of articles, right sink is for cleaning hands

With bottom shelf and 2 front doors

In SS304, with high anti-corrosion.

Side table

Size
1000x600x1000mm

Container Dimension

Shipping Container Dimensions

Our shipping containers come in the following dimensions:

Standard design		20 ft. container (Global)	40 ft. container (Global)
External dimension	L	6.058m	12.192m
	W	2.438m	2.438m
	H	2.591m	2.519m / 2.896m
Internal dimension	L	5.758m	12.032m
	W	2.352m	2.352m

Flexbil Global Availability

The modular nature of our containers allows for easy expansion or reconfiguration, providing a scalable solution that grows with your business.

By choosing our shipping container-based Self-Service Stores, our customers benefit from a high-quality, durable solution that is both versatile and practical.

This approach not only supports global expansion but also offers a sustainable and efficient way to establish and grow retail presence in diverse locations.

The convenience and adaptability of our containers ensure that our customers can maintain a competitive edge in a dynamic market environment, all while delivering exceptional service to their own clients.

QUALITY CONTROL

The second type is mandatory inspection by managers. Production managers at all levels are responsible for quality management and conduct mandatory inspections in the workshop.

Finally, special quality inspectors perform patrol and random inspections. Unqualified workpieces are returned to the previous process for rework.

Coating Inspection:

During the spraying process of the product, the quality inspector will sample various indicators of the coating, including color, uniformity, missing spray areas, coating thickness, and hardness.

The product is inspected before packaging and loading, adhering to the principle that "unqualified raw materials will not enter the factory, and unqualified products will not leave the factory."

After-Service

A technical support center, composed of a group of outstanding professional and technical personnel, provides customers with after-sales service support in a 5x8-hour service mode.

Customers can submit questions by telephone, fax, email, etc.

Our relevant employees will address issues through telephone calls, online videos, or on-site visits.
